

DECOSPHAERA® DEEP BLACK 30 F

Chemical description

DECOSPHAERA® DEEP BLACK 30 F are crosslinked pigmented polyurethane spherical microbeads, produced through a water-based industrial process.

Main use

DECOSPHAERA® DEEP BLACK 30 F enhance both performance and aesthetics in coatings and specialty applications. Their unique balance of toughness and elasticity makes them essential for high-performance formulations, offering:

- Matting Properties - Reduce gloss, even at 85°.
- Haptic Enhancement - Creates a rich, matric-like textured sensation.
- Functional Benefits - Improve mechanical strength, abrasion resistance, and chemical durability.

Typical values

Appearance: Black powder

pH (10% dispersion): 5 - 8

Dry content: 99 ± 1%

Oil absorption: 50 - 75%

Bulk density: 500 - 800 g/l

Granulometry d(50): 22 - 30 µm

Product properties

The dosage of DECOSPHAERA® DEEP BLACK 30 F in varnish should be adjusted based on the desired effect. They offer broad compatibility, making them suitable for use in water-based, solvent-based and UV/EB coatings; however, it's important to conduct compatibility testing for specific formulations, especially when incorporating them into solvent-based paints. The low oil absorption of DECOSPHAERA® DEEP BLACK 30 F allows for high loading levels, enabling the achievement of deep matte finishes without compromising rheology.

Applications

DECOSPHAERA® DEEP BLACK 30 F are widely used in various applications, including:

- High-quality paints & specialty coatings - Enhancing performance and visual appeal, particularly in the decorative architectural paints where deep matte finishes with a textured feel is needed.

Moreover, the combination of different DECOSPHAERA® colored grades allows the development of sophisticated decorative effects, enhancing both visual and tactile properties. These effects can be further intensified by the contrast with a pigmented base.

DECOSPHAERA® DEEP BLACK 30 F can be incorporated at any stage of processing, as long as adequate stirring is applied to ensure uniform dispersion.

Storage and handling

DECOSPHAERA® DEEP BLACK 30 F is stable for 12 months from the production date when stored in dry, cool conditions within original sealed boxes. The recommended storage temperature is between 5°C and 30°C.

Please close the inner lining of opened boxes to avoid moisture absorption and contamination.

Packaging

DECOSPHAERA® DEEP BLACK 30 F is available in 20 kg boxes.

Material safety

Please refer to the product's safety data sheet before use.

Regulatory information

In case compliance with specific regulations is required please contact our sales representatives.
